January 2002 Data Report

Water Supply Contingency Plan Production Well Sampling Program Crafton-Redlands Plume Project Facsimile

562.951.2100

### Dear Mr. Simpson:

This report presents a summary of results of the Water Supply Contingency Plan production well sampling for the month of January 2002. The Water Supply Contingency Plan (WSCP) was prepared by Lockheed Martin Corporation and submitted to the State of California Regional Water Quality Control Board (RWQCB) Santa Ana Region on September 30, 1996. The plan was conditionally approved by the RWQCB in a letter dated March 6, 1997. The WSCP for the Crafton-Redlands Plume was prepared to address maintenance of water supply to purveyors in the event that wells became impacted with trichloroethene (TCE) from the Crafton-Redlands TCE Plume. A summary of key dates and WSCP sampling program evolution is provided on Table 1.

The locations of the WSCP wells and analytical results for the January 2002 sampling event for TCE and perchlorate are shown on Figures 1 and 2, respectively. Table 2 presents a summary of analytical tests performed on each WSCP well and water system sampling point. The sampling frequency of each well is once a month for the first year. More frequent sampling, if required, is based on the analytical results as outlined in the WSCP TCE and perchlorate decision matrices, provided as Figures 3 and 4, respectively. The perchlorate decision matrix was presented in the Perchlorate Work Plan and Schedule, which was submitted to the RWQCB on August 15, 1997. The RWQCB approved the Perchlorate Work Plan on October 31, 1997. Table 3 presents a summary of the wells sampled twice monthly according to the decision matrices.

On January 9, 2002, the California Department of Health Services lowered the PAL for perchlorate from 18  $\mu$ g/L to 4  $\mu$ g/L. The Decision Matrix for Sampling Production Wells for Perchlorate (Figure 4) is being revised to reflect the new 4  $\mu$ g/L PAL, and will be submitted to the RWCQB for approval. Until the new decision matrix is approved, sampling for perchlorate will continue under the current WSCP and decision matrix.

#### RESULTS

Summaries of the analytical results for the January 2002 WSCP sampling event for TCE and perchlorate are shown on Figures 1 and 2, respectively, and presented on Table 4. Available groundwater elevation data are provided on Table 5. The water sampling field forms are provided in Attachment A. Chain-of-custody, laboratory data sheets, and Level III laboratory quality assurance/quality control (QA/QC) documentation are provided in Attachment B.

#### Trichloroethene

Four groundwater samples collected in January met or exceeded  $2/5^{th}$  the MCL for TCE (i.e., were greater than or equal to 2.0  $\mu$ g/L) including: Gage 26-1 (6.2  $\mu$ g/L), Gage 29-2 (4.2  $\mu$ g/L), Gage 29-3 (5.1  $\mu$ g/L), and Gage 92-1 (2.4  $\mu$ g/L). The TCE impacts at Gage 26-1, Gage 27-1, Gage 29-2 and Gage 29-3 are partially attributed to the Norton AFB plume and partially attributed to the Crafton Redlands plume.

TCE was non-detect at 0.5 µg/L in COLL Richardson #1.

The following wells were in TCE treatment this month: Gage 26-1, Gage 27-1, Gage 29-2, Gage 29-3. Therefore, these four wells will be sampled once a month for TCE when active.

COLL Richardson #1 and Gage 51-1 are currently being sampled twice a month for TCE, if active. Gage 92-1 will now be sampled twice a month, if active, according to the TCE decision matrix, Figure 3.

#### Perchlorate

In the January WSCP sampling, perchlorate was detected at or above the PAL (i.e., greater than or equal to 4.0  $\mu$ g/L) in nine wells and three water system sampling points including:

 Richardson #1 (4.4 μg/L)
 LL Univ Anderson #2 (5.7 μg/L)

 LL Univ Anderson #3 (4.4 μg/L)
 Gage 26-1 (6.7 μg/L)

 Gage 27-1 (5.7 μg/L)
 Gage 29-1 (9.5 μg/L)

 Gage 29-2 (19 μg/L)
 Gage 29-3 (38 μg/L)

 Gage 92-1 (31 μg/L)
 Gage Delivery (7.4 μg/L)

  $7^{th}$  & Chicago (5.1 μg/L)
 Gage Arlington (6.9μg/L)

Under the WSCP, wells at or above 75 percent of the previous PAL (i.e., greater than or equal to 13.5  $\mu$ g/L) are sampled twice a month. As a result, Gage 29-2, Gage 29-3, Gage 51-1, Gage 66-1, Gage 92-1 and COLL Richardson #1 wells are currently being sampled twice a month for perchlorate, if active. This practice will be revised or deleted when the sampling protocol is changed in response to the lower perchlorate PAL.

### **CLOSING**

Earth Tech greatly appreciates being of continued service to Lockheed Martin Corporation on this project. Should you have any questions or comments, please do not hesitate to call.

Sincerely, Earth Tech

Eric Peterson, P.E.

Program Director

Matthew Werner, R.G., C.E.G., C.H.

Project Manager

**TABLES** 

#### TABLE 1

#### KEY PROJECT DATES AND WSCP SAMPLING PROGRAM EVOLUTION

August 2, 1996, the RWQCB – Santa Ana Region requested Lockheed Martin to submit a conceptual Water Supply Contingency Plan.

September 30, 1996, Lockheed Martin submitted the Water Supply Contingency Plan (WSCP) to the RWQCB – Santa Ana Region.

March 6, 1997, the RWQCB conditionally approved the WSCP, which included sampling eight production wells (City of Loma Linda Richardson #1, Richardson #2, Mountain View #1, Mountain View #2, Victoria Farms Mutual Water Company Wells #1 and #3, and Southern California Edison #1 and #2).

June 1997, Victoria Farms Mutual Water Company was connected of City of San Bernardino Water. Pumping ceased at VFMWC #1 and #3, and the two wells were removed from the program.

June 1997, sampling of SCE #1 was discontinued because it is not operated on a regular basis. The WSCP consists of five wells, including COLL Mountain View #1 and #2, COLL Richardson #1 and #2, and SCE #2 (AUX).

August 1997, the WSCP was expanded due to the detection of perchlorate in municipal supply wells in the Bunker Hill Basin. Twenty-six wells were added to the WSCP including nineteen City of Riverside wells, five City of Redlands wells, and two Loma Linda University wells, for a total of 31 wells.

October 1997, three City of Riverside water system sampling points were added to the WSCP, including the Gage system pipeline (Gage Delivery), the Waterman system pipeline (Iowa Booster), and the sampling station measuring outflow from the Linden and Evans Reservoirs (7<sup>th</sup> & Chicago).

March 1998, two City of Loma Linda water system sampling points were added to the WSCP, including the Mountain View system pipeline (Mountain View Blend at Lawton) and the Richardson system pipeline (Richardson Blend).

June 1998, one City of Riverside irrigation water system sampling point (Gage Arlington) and one additional City of Loma Linda water system sampling point (Mountain View Blend at Timoteo) were added to the WSCP.

December 1998, the COLL Richardson #3 well was added to the WSCP Sampling Program.

May 1999, Sampling of Mountain View Blend at Timoteo was discontinued because it does not represent a blend sample of the Mountain View pipeline system.

December 1999, the COLL Mountain View #3 well and the Gage 98-1 well were added to the WSCP Sampling Program

February 2000, the COLL Richardson #2 well was decommissioned, and therefore removed from the WSCP Sampling Program.

May 2000, Mountain View #2 was decommissioned, and therefore removed from the WSCP Sampling Program.

October 2000, COLL Mountain View #4 and COLL Richardson #4 were added to the WSCP Sampling Program.

LOCKHEED MARTIN

March 28, 2002

Mr. Gerard J. Thibeault Executive Officer California Regional Water Quality Control Board Santa Ana Region 3737 Main Street, Suite 500 Riverside, California 92501-3339

Dear Mr. Thibeault:

In accordance with the approved Water Supply Contingency Plan, enclosed is one copy of the January 2002 production well sampling report prepared by Earth Tech for Lockheed Martin Corporation. This report presents results from samples collected at Bunker Hill Basin production wells in January 2002.

Please note that the Decision Matrix for Sampling Production Wells for Perchlorate (Figure 4) is being revised to reflect the new 4 ppb PAL, and will be submitted to RWQCB for approval.

Should you have any questions or comments, please contact Bob Simpson at 909-778-6046.

Sincerely,

Gene Matsushita
